Skills

OS
Windows

LANGUAGES
Python, javascript, SQL

FRAMEWORK
reactJS, Web-development, OpenCV

DATABASES
MySQL

OTHERS
Github,Sublime Text, Visual Studio,
Tableau

Coursework

Data Structures
Algorithm
Machine Learning
Discrete Mathematics
Operating Systems
MySQL
Data Analysis
Data cleaning

Education

B.TECH. IN CSE-DS
NIET GREATER NOIDA
CGPA : 8.495/10(till now)
 2018-2020

INTERMEDIATE
Fr Agnel School, Greater Noida
Percentage: 86.6%

2016-2018
HIGH SCHOOL
Alexander pub school, meeruth
Percentage: 76.6%

Experience

2022	**Oasis Infobyte**	**Data science Intern**

Created a model of iris flower classification.
Created a model of Document Scanner.
Python, Pandas, Numpy, matplotlib, sklearn

2022	**Nolox**	**Web Development Intern**

Worked on a website of a cunstruction business. I used to worked on contact page.
ReactJS, HTML, CSS, Java script, MongoDB

Achievements/Awards

Nov-2022	**Hacnovate Hackathon**	**Finalist**

In this hackathon Developed School/College management system.

march-2023	**Hackathon**	**Finalist**

In this hackathon Developed an attendance system using openCV.

Accomplishment

- Data science with python - Simplilearn certification
- Data analysis with python - IBM certification
- Applied data science capestone - IBM certification
- Data Visualization with python - IBM certification
- Python Projects for Data science - IBM certification
- Machine learning with python - IBM certification
- 2020 Complete Python Bootcamp From Zero to Hero in Python
- Basic Data Descriptors, Statistical Distributions, and Application to Business Decisions

Side Project

March-2023	**Face Detection and Recognition**	**Python, OpenCV**

Developed an AI based system using openCV for face detection and reognition. Created a attendence system using this technology.

Dec-2022	**Laptop Prize predictor**	**ML, Dataset cleaning**

Created a predictive model that can predict the price of any laptop using Decision tree algorithm and feature selection.

Oct-2022	**Movie Recommendation System**	**NLP, preprocess, model build**

Created a model that can predict the next movie using the current movie.
